

Dear friends and colleagues,

Our Group of Companies has always been a pioneer in capturing the new trends of the current era; accordingly, we have created the present web site in order to best inform the Medical Society on the modern curing techniques and the scientific breakthroughs for Spine and Musculoskeletal diseases.

Our corporate vision is to stay close to the scientific pioneers and, by focusing on new developments, we manage to represent and successfully promote in the Greek medical market many advanced state-of-the-art surgical techniques. Such technologically advanced products improve the quality of life of the patients, while facilitating the surgical task.

My colleagues and I should remain at your disposal for any inquiry or information needed.

Best regards,

Panayiotis Fountas

President and Founder
